

INDUSTRIAL POST STEEL WIRE SHELVING

STORABLESSM

INDUSTRIAL POST STEEL WIRE SHELVING

Our Industrial Post Steel Wire Shelving is our most versatile shelving solution. It can be used in any room of the house—as a kitchen island, laundry center, closet, entertainment center or for storing all the extras in your garage or basement. We can create many solutions for business needs as well.

Manufactured to our exact specifications, our Industrial Post Shelving is stronger, heavier and made with more wire than many “look-a-likes” on the market. Each shelf, depending on the size, can hold between 300 and 500 pounds.

We sell our vast selection of Industrial Post Steel Wire Shelving components individually, not in kits, so you can choose the correct size, height and number of shelves for your solution. We also have a large selection of accessory baskets, hooks and overlays to complete your shelving system. Our expert associates can assist in creating a custom solution for almost any storage need or space.

INDUSTRIAL POST SHELVING ASSEMBLY INSTRUCTIONS

1. Orient the post so the end with the adjustable foot is at the bottom.

2. Determine at what height you want to place the bottom shelf.

3. Place the two pieces of the plastic sleeve, smaller end up, around the post just above the groove where you'd like the bottom shelf to sit.

4. Push the two halves together and pull down. You should hear a “click” so you'll know it's in place. Repeat for all four posts.

5. Slide the shelf over the tops of the posts and down until it rests on the sleeves.

6. Press down firmly on the top of the shelf or tap it with a rubber mallet so it sits snugly on the sleeves. Repeat with the other shelves, working from the bottom up.

Watch a video with step by step instructions on assembling your industrial post shelving system.
